

# Sensational unveiling on upcoming ICE show

Austrian Gaming Industries GmbH (AGI), the wholly owned subsidiary of Novomatic Group of Companies announces a product and game presentation for ICE 2006 that exceeds all expectations. Besides exciting new games and pioneering new technologies, AGI has announced the unveiling of a brand-new cabinet.

The company's slogan "Novomatic Leads, Others Follow" is not just a message for the employees, but a philosophy for their every day behaviour. This is one of the reasons why Novomatic is leading the way with their consistent innovations in new technologies.

Jens Halle, Managing Director AGI: "We will have more new game and technology presentations than ever before. We are very proud of this achievement, and it pays back all the high investments we have put into our research and development activities. Our slogan is our mission statement, and our motivation. It describes what our success is built on. The new cabinet that we will unveil on the show will again lead the direction to where the future of our business is going."

The presentation of the new entrant to AGI's multi games family will be a revolution in Bingo.

Burning Bingo™ – the perfect simulation of the popular live game Bingo.

It is also based on the multi game server platform NOVO Unity™, which allows casino guests to choose between the multi players Novo Multi-Roulette™, Novo TouchBet® Roulette and Novo Flying Roulette™ on only one terminal. The resulting product Novo Multi-Table Roulette™ offers maximum entertainment and flexibility to casino guests and is extremely flexible to manage and control for the operator.

Visitors to the Novomatic stand can also look forward to entering new, stunning game worlds.

Fascinating journeys to the old Egypt, breathtaking jewels, exciting mosquito hunting, thrilling space travels and gambling with flambéed fruits, just a small fragment of the voluminous offer that AGI has prepared for their audience.

The whole AGI-team is looking forward to welcome their guests at stand Nr. 3030.
