

Casinò di Venezia first in Europe to install Zorro™ Link™

London: Aristocrat Technologies Europe has completed its first installation of Zorro™ Link™, unveiled to a European audience at January's ICE. A bank of 10 machines, comprising six Zorro II™, two Zorro Returns™ and two Zorro Mask™ games, has been located in the newly opened slot room at the old Casinò di Venezia in Venice, Italy.

Featuring Aristocrat's patented Hyperlink™ technology, the system offers four jackpot levels ranging from the 'Mini' prize of €15 up to a 'Grand' prize of €15,000 and operates on a five cent denomination.

The Casinò di Venezia management team first saw the Zorro™ Link™ in operation at Sydney's Star City Casino and were keen to bring it onto their own floor: "The casino group likes to keep abreast of the latest technology and product offerings," explained Director General, Carlos Pagan, "which is key to maintaining a hugely successful business."

Aristocrat Technologies Europe Sales Director, Marcus Honney commented: "We are thrilled that Casinò di Venezia has adopted Zorro™ Link™. The casino is a market leader and always adopts the latest innovations."
