

DIAMOND X 1.55J – Elegantly curved gaming beyond X-pectations

After this year's international launch of the multi-screen version, NOVOMATIC now heralds the impressive single screen version of the DIAMOND X™ cabinet series: DIAMOND X™ 1.55J.

Gumpoldskirchen – After the launch of the DIAMOND X™ 2.32 multi-screen cabinet in March, NOVOMATIC now follows up with the brand-new DIAMOND X™ 1.55 J-curve version of this magnificent video slot cabinet. Its elegant J-curved 1.55" UHD PCAP touchscreen and the exquisite LED silhouette make the DIAMOND X™ 1.55 a safe bet for exciting curve screen game presentation and maximum player appeal.

Refined details like the large foot well, two XL start buttons and the indirect LED lighting concept with intelligent game-synched colour effects ideally contrasting the black metro finish create a sophisticated blend of ergonomics and

ambiance. Further design elements, which the DIAMOND X™ 1.55J shares with its sister cabinet are the modern front door panel with the characteristic facelift of the grill and the player interface options: button deck as a standard and a 15.6" TouchDeck™ player interface complemented by two extra-large physical buttons as an option.

The improved maintenance concept for the DIAMOND X™ 1.55J includes a monitor mounting that can be hydraulically lifted, granting excellent access to the key components as well as a folding mechanism for space-optimized, safe transport.

The DIAMOND X™ 1.55J now launches with the exclusive XTENSION LINK™ for the international markets.

Jakob Rothwangl, VP Global Sales NOVOMATIC AG, said: "The DIAMOND X™ 1.55J is our first NOVOMATIC cabinet with the J-curved screen and in any case a successful premiere. It perfectly complements the 2.32 multi-screen version, delivering a highly intriguing presence on the gaming floor, thanks to its stunning indirect LED lighting concept against the backdrop of the black finish. This hardware achievement is complemented by exciting and dedicated content utilizing the big upright screen format. I dare say that the DIAMOND X™ 1.55J definitely has the makings of a new bestseller."
