

Cashman Fever™ the Centrepiece Attraction in London

Cashman Fever™, Aristocrat Technologies' latest linked jackpot game, features as the centrepiece attraction on stand 3415 at this week's ICE exhibition in London.

Released to European markets in late November, Cashman Fever was recently premièred at Monte Carlo's prestigious Casino Café de Paris and has since been installed at a number of venues in Germany.

Damien Greig, Senior Regional Sales Manager at Aristocrat Europe said the game's unique method of jackpot pooling sets Cashman Fever apart from other progressive links.

"Players will soon realise the importance of bet level and how it impacts the way that the Super, Jumbo, Mega and Mighty jackpot pools are incremented," Mr Greig said.

"Where groups of players are involved, excitement will build as each individual attempts to gain an edge by using different playing patterns.

"The simplicity of the Cashman™ Nudge, Cashman™ Multiplier, Cashman™ Wild reels and the Hold and Re-spin will also make it easy for first time players to enjoy the benefits of feature bonusing right from the start.

"The Cashman riff will soon become a familiar winner's tune on show floors, creating a distinctive audible attraction to

rival the likes of the famous Cash Express™ whistle,” he said.

Cashman Fever will be presented at ICE with current 50 line base games Amazon™ and Top Croc™, alongside the soon-to-be-released Red Crane™.
