

Gaminators™ for Bayerische Spielbanken

Following the presentation of Austrian Gaming Industries GmbH (AGI) of their latest product offerings at the ICE in London earlier this year Bayerische Spielbanken have recently placed substantial orders for these new video slot games.

Most of the games will be delivered in AGI's latest innovation in slot technology, the Gaminator™, a sophisticated new electronic gaming machine offering the full range of CoolFire™ platform features and game functions. This space-optimised stream-lined cabinet of only 440mm total depth in elegant silver contains two extra-large TFT screens, inclined to each other with minimum space between them for increased player convenience, touch interface, player tracking options and superior stereo sound. The modular design allows configuration options for use of reels plus TFT monitor and dual screens.

Double-monitor cabinets introduce new possibilities for the presentation of exciting 3D animations. AGI's game designers created games embodying highly interactive second-screen features with complex and extensive graphics and amazing sound. Additional information screens and dynamic pay tables provide user-friendly interaction adding to player comfort. During idle mode, all games display theme specific dynamic animations – attracting players to the machine.

Managing Director of Bayerische Spielbanken Josef Müller says these benefits are convincing: "Our operations in Garmisch-Partenkirchen, Bad Kissingen and Feuchtwangen have been the first in Germany to introduce Gaminators™. We like to surprise our guests with innovative concepts. The Gaminator™ gives us a competitive edge ahead with a whole range of new adventurous video games like Roller Coaster™, Marco Polo™, Queen of Hearts™ and Lucky Lady's Charm™. Based on the very

enthusiastic acceptance of our guests we have now ordered additional Gaminators™ for our operation in Bad Reichenhall.

Mr. Jens Halle, Managing Director of AGI is very pleased with this development: “Bayerische Spielbanken and Austrian Gaming Industries have built an extremely successful and close working relationship over the past few years which we hope will continue to grow.”
