

First NOVO Unity™ in Germany – Spielbanken Niedersachsen precursor in technology 🇩🇪

The maximum in gaming pleasure at Spielbanken Niedersachsen – Austrian Gaming Industries GmbH (AGI) delivers the newest NOVO Unity™ Multi-Player Systems to Germany.

Spielbank Bad Zwischenahn and Aquamarin Casino Seevetal are making room for the latest Multi-Player machines from Novomatic, with the intention of providing the maximum in entertainment for the casino guests in Niedersachsen.

Hartmut Meier, Online-System-Administrator and Area Manager of Automatenspielbanken

Niedersachsen: “We are very excited about the new systems in our casinos. The trend for slot machines is increasing in Germany and we had to expand our offering quite urgently. AGI is presently our clear favourite for video slot machines and Multi-Player system.

The new NOVO Unity™ platform is the perfect system, it reacts very quickly to individual trends and preferences of casino guests and we are proud to have the first high-tech system in Germany. NOVO Unity™ is impressively flexible and we are convinced that the new machines will be well embraced by our casino guests.”

The run on the Novo Multi-Roulette system in Aquamarin Casino Seevetal has been so high that an order of a second system was required to expand the offer of terminals from 14 to 22. The new Novo Multi-Roulette scores through its user-friendly

display of all bets placed on the plasma screen. The spinning of the wheel is simulated in a virtual 3D environment and displayed in real time and with high-resolution graphics.

Spielbank Bad Zwischenahn celebrates a premiere in Germany with the new NOVO Unity™ Multi-Table-Betting system with 2 automatic roulette wheels. This flexible system gives casino guests the possibility to bet on up to 3 different roulette wheels on one terminal.

“The NOVO Unity™ system in Spielbank Bad Zwischenahn is the first in Germany. We are celebrating a premiere and are very anxious about the casino guests’ reactions. NOVO Unity™ was launched for the TouchBet® Roulette family of products and

is a server based multi game platform that allows a number of games such as Novo TouchBet® Roulette, Novo Flying Roulette™, Novo Multi-Keno™ and Novo TouchBet® Live-Sic Bo to be run on different terminals in the same casino. This offers the ultimate in flexibility for casino operators. I am convinced that the system will turn out to be a big seller,” explains Jens Halle, Managing Director of AGI.
