

Austrian Gaming Industries delivers a large amount of gaming equipment to Baltic Gaming A/S

Austrian Gaming Industries GmbH (AGI), the wholly owned subsidiary of Novomatic AG, announces the delivery of a large amount of its gaming equipment to Baltic Gaming A/S, the second largest gaming company in Latvia in terms of turnover.

The new machines and games that are going to be launched in Latvia range from the very popular Gaminator®-machines with games like Knights Quest™, Riches of India™, Lucky Ladys Charm™, Columbus™, Heart of Gold™, Venetian Carnival™, Dolphin's Pearl™, Roller Coaster™, High Roller™ and Book of Ra™ to the favoured Multi-Gaminator® – machine, on which casino guests can choose between 10 different games on one machine, removing the need to move to another, free slot machine for more excitement.

Voldemar Staprens, Director of Slots Department, states: "The Latvian market is a very strong and expanding one. That's the reason why we have to be extremely careful about trends and the requirements of our casino guests, because we have to expect and fulfil their wishes. After our first order from AGI we have quickly recognised how popular their products are with our casino guests. It is the mixture of high-tech machines and exciting games coupled with breathtaking graphic animations that makes AGI – machines the most coveted ones."

Baltic Gaming A/S employing currently more than 600 employees, was founded in 1991. Since then, Baltic Gaming A/S has strongly expanded with the opening of new, respectable casinos and a number of entertainment gaming clubs in various

countries e.g. the Russian Federation, Sweden and in Western Africa.
