

insic: new identification and 18+ system presented at the ICE 2016 in London

Ahrensburg/London: insic presents new system for identification and age verification checks at the ICE Totally Gaming summit in London. Unique workflow management, brand new technology and a new pricing concept allow an easy entry into this element of compliance technology. We got 100% positive feedback on our approach and the core message – „game changer instead of best practice“.
